Our travel continues on to view scenic **Lake Toya**, a large volcanic caldera lake located in the Shikotsu-Toya National Park. This picturesque lake was chosen as the location of the G8 summit hosted in Japan in the summer of 2008. In addition to the lake, this region features **Mt. Showa Shinzan**, one of Japan's youngest and still active volcanoes. Showa Shinzan originally emerged as a little hill, but after a series of earthquakes and mud slides, it continued to surge upwards to reach its present height. It is an awesome sight to see as it sits there hissing steam. Mt. Usuzan, the force behind the creation of Showa Shinzan, can be seen in the distance. Weather permitting, we will enjoy a ride on the **Usuzan Ropeway** to the observation deck at the top of the Mt. Usuzan Ropeway Summit Station to view a spectacular sight of the volcano's summit, panoramic views of Lake Toya and the neighboring Showa Shinzan. Standing at the front entrance of the museum is an old-fashioned steam clock, presented to Otaru by the city of Vancouver, British Columbia. Created in all sizes, shapes and colors, this is one of the most popular souvenirs to bring home for your family and friends. We'll continue on to spend the night in Sapporo, capital city of Hokkaido. Dinner will be on your own this evening.

SOUNKYO - KITAMI - ABASHIRI (B)(D)

The largest of Japan's national parks - *Daisetsu-zan* - contains the very essence of rugged Hokkaido: vast plains, soaring mountain peaks, hidden gorges, cascading waterfalls, forests, and wilderness. The main route through the park is **Sounkyo Gorge** - a scenic ravine that extends into the park. For a 5-mile stretch, sheer cliffs rise on both sides of the canyon as the road winds through the mountain. This tame gorge is renowned for its picturesque waterfalls featuring two of the main ones: **Ryusei-no-taki (Shooting Star Falls)** and **Ginga-no-taki (Milky Way Falls)**. We'll make a photo stop to view both of these falls before continuing on to spend the night in **Abashiri**, a city overlooked by Mount Tonto-zan and the Sea of Okhotsk. On arrival in Abashiri, we'll visit the **Abashiri Prison Museum**, consisting of many buildings which were in use until the year 1984. Anguished-looking mannequins bring it all to life as we retrace the history of convict labor and the harsh life of a prisoner on a tour of this open-air site. A visit to the **Okhotsk Ryuhyo (drift ice) Museum** located on Mount Tonto provides interesting explanations about the history of drift ice that flows into the Sea of Okhotsk.
